₹50 lakh per carat

₹3.125 crore total value

The Iconic Cornflower Blue

TheBlueAura

Crafted by nature, treasured for generations

This exceptional gemstone showcases the iconic cornflower blue hue that has captivated gem lovers and royalty for over a century. The velvet-like texture, a signature of sapphires from the original Kashmir mines, creates a subtle yet mesmerizing glow.

Masterful Cutting

The round mixed cut is a rare choice for Kashmir stones due to high material loss during cutting. Every facet is precisely angled for optimal light performance, creating vibrant internal fire that dances with movement.

Unparalleled Rarity

Historic Origin

From legendary Kashmir mines no longer in production, representing a finite geological treasure.

100% Natural

Untreated and unheated, maintaining its original color and structure as nature intended.

Uncommon Cut

Round cut is rarely seen in Kashmir sapphires due to significant cutting challenges and material loss.

Triple Certification

The Blue Aura

Crafted by nature, treasured for generations

The Highest level of certification can be acquired when required for this genuine, authentic stone.

GRS Certification

Confirming Kashmir origin and natural status.

Gübelin Certification

Verifying authenticity and quality parameters.

SSEF Certification

Validating the gemstone's exceptional characteristics.

Investment Potential

At ₹3.125 crore, this gemstone offers both beauty and strategic value. High-quality, untreated Kashmir sapphires continue to see steady demand and increasing value in both private markets and global auctions.

A Piece of History

TheBlueAura

Crafted by nature, treasured for generations

1880s

Discovery of sapphires in Kashmir's remote Zanskar mountain range at 4,500 meters elevation.

1

2

3

Present Day

Kashmir sapphires become increasingly rare collectibles, with fewer specimens available each year.

1887-1930s

Limited mining operations extract the world's finest sapphires before deposits are exhausted.
